

## BE THE CHANGE

Where do we go from here  
And how do we move beyond the pain  
Where do we go from here  
And how do we bridge this great divide  
Like watching for a field of flowers to bloom  
It's gonna take time to heal these wounds  
From the trail of tears in our wake  
To younger generations undefiled  
We'll be a lighthouse to guide their minds  
Be the change we want to see  
Come on let's be the change  
Where do we go from here  
And how do we let go of the past  
Where do we go from here  
And when will we learn from our mistakes  
Like watching for a field of flowers to bloom  
It's gonna take time to heal these wounds  
From the trail of tears in our wake  
To younger generations undefiled  
We'll be a lighthouse to guide their minds  
Be the change we want to see  
Come on let's be the change

## I'LL BE YOUR RADIO

I don't have to be your everything  
I would be content just to occupy your head  
And I don't have to be your sun and moon  
As long as you don't mind that I provide  
A soundtrack to your mood  
I'll be your radio everywhere you go (x3)  
Your personal stereo for you and you alone  
I don't have to be anywhere that you can see me  
I would be alright if just to find  
Some shoulder space where I  
Could whisper in your ear  
And tell you all the things you deserve to hear  
What ought to be a thankless job  
But just to be close to you's reward enough  
I'll be your radio everywhere you go (x3)  
Your personal stereo for you and you alone

## BATTLEFIELD

A soldier wouldn't go  
Marching off to battle without a sword  
And the mason couldn't hope to shape his stone  
Without the hammer that he had come to rely on  
A student wouldn't show up for the final test  
Before they'd even had a chance to peruse the text  
And a sailor wouldn't take to the sea  
Before plotting his course  
Or run the risk of arrival to a foreign port  
But don't you see  
Your mind is the battlefield  
Your mind is the battlefield  
And your tongue is your sword  
Your mind is the battlefield  
And your compass is your heart  
You don't wanna be  
Unequipped, unprepared  
Unrehearsed, unaware

## LOVE ISN'T ALWAYS ENOUGH

Oh the time has come for you and I  
To go our separate ways  
I need you to know that you will always be  
Precious to me babe  
Oh we tried and we tried and we tried  
To fulfill each other's needs  
To the best of our ability  
Tried so hard  
But the reality is love isn't always enough  
Every day with you I'm just learning  
Learning about myself  
If only I could go back in time  
I'd make everything right  
Oh, I tried and I tried and I tried and I tried  
To give you all the love I have inside  
Tried so hard  
But the reality is love isn't always enough

## UNIVERSAL CHORD

The Milky Way hovers over our heads  
The earth rotates and there it is again  
The planets spin vibrations in harmony  
Creating a universal chord  
That someday we will all be listening for  
The babbling brook sings us a melody  
That soothes the soul, sends you into a dream  
The pteridophytes have a frequency  
It's part of the universal chord  
That we will all be listening for, for ever more  
The shadows draw back to reveal the light  
The cold is humbled by the warmth it provides  
The patient wisdom in the elephant's eye  
Is part of the universal chord  
That we will all be listening for, for ever more  
Along you came proclaiming I was the one  
And with you came a light as bright as the sun  
Our love will vibrate for eternity  
It's part of the universal chord  
The sound we hear as raindrops fall to the ground  
Predators of the night contribute a howl  
Galloping horses, unaware that they found  
A part in the universal chord

## WHY DON'T YOU CALL ME BABY ANYMORE

You used to call me on the phone  
Whenever you were home alone  
Just to feel the comfort of my voice  
And now when I reach out to touch your hand  
I see the hesitation in your glance  
Honey, tell me what's goin' on  
Why don't you call me baby anymore  
It used to be sometime ago  
That anywhere I went you'd go  
Couldn't stand to be away from your man  
And now when I reach out to spend some time  
You quickly find a reason to decline  
Honey, tell me what's goin' on  
Why don't you call me baby anymore

## EVALEE

Oh, Evalee, darlin' won't you dance with me  
Under the moonlight  
Where the stars can shine upon your eyes  
Evalee, honey won't you dance with me  
I'm not tryin' to take you home  
I just wanna hold your hand  
And pretend that I'm your man, Evalee  
Oh, Evalee, honey won't you dance with me  
Until this song is done  
Though I pray the end will never come  
Evalee, darlin' won't you dance with me  
I'm not tryin' to take you home  
I just wanna make you smile  
And be close to you awhile, Evalee  
I know I've got two left feet  
But baby won't you dance with me  
I know I've got two left feet  
But won't you dance with me, Evalee  
I know I've got two left feet  
But darlin' won't you dance with me  
I know I've got two left feet  
But baby won't you dance...with me

## CONNECTED

It's so strange, the way  
That people choose to live today  
Living our lives in pursuit of acquisition of things  
And it seems to be our destiny  
To interrupt the natural order of things  
Like a dam to a stream  
The flow we only impede  
We're so disconnected  
Given our current trajectory  
It's unlikely to bridge this disparity  
Yet we yearn so desperately  
To cleave to a spiritual battery  
Gotta get back to the garden again  
Stop tryin' to find replacements for the genuine  
This artificial reality is warm and inviting  
But it keeps us disconnected  
So come on y'all, let's get connected  
Don't you know we gotta get connected

# EMBRACE WHAT WE ARE

Innocent blood soaks the ground  
Of yet another man whose hands were bound  
His memory we desecrate  
If the truth we don't emancipate  
It breaks my heart to see  
This rampant inhumanity  
We can do better  
If we search for compassion  
And put ourselves into the shoes  
Of those whom we would persecute  
Soften your heart, lower your guard  
Let your fears be vanquished  
By this simple truth  
That you're my sister  
You're my brother  
Let's embrace what we are  
And stop killing each other  
So many go about their day  
With the looming fear  
That their children may not live  
To see another year  
How much will it take  
To instigate a change

See one another as family  
Put down the guns and disengage  
Soften your heart, lower your guard  
Let your fears be vanquished  
By this simple truth  
That you're my sister  
You're my brother  
Let's embrace what we are  
And stop killing each other

## SOUL SYMPHONY

I always was a dreamer  
Never hearing the things  
That my daddy was sayin' to me  
And musically inclined  
My mind was always preoccupied  
Dreamin' of the day  
When the music I make  
Might affect a change  
'Cause I believe that music and love  
Have the power to heal  
Tantamount to these  
Compassion, tolerance and empathy  
'Cause we all experience pain  
And we all feel the strains  
So everybody won't you come along  
And rest your weary bones  
Upon my soul symphony  
Soul symphony, soul symphony  
I only pray that it may  
Relieve you of all your pain

## HOW LONG

You say you want to make the people free  
You say you know exactly what they need  
But silver spoons don't consort with tattered shoes  
And the trogon will fly backwards when they do  
You say you understand the common plight  
But not a single day you've had to fight  
Upon your head a crown of priceless jewels  
While your people have no shelter, bed or food  
How long will you ignore the people's cries  
And turn away from their lamenting eyes  
It only takes a shred of humanity  
To see a slave and want to set them free  
How long, how long, how long
